PERSONAL PROJECTS

E-commerce Store

- <https://github.com/PradeepK9/Ecommerce-mern-stack>
- It's an e-commerce site with user and admin panel
- Here users can add items to cart, make payment and place order and admin can see all orders all users and can update and delete users
- Implemented features like search, filter, login, logout, JWT authentication etc.
- Used Nodejs, express and MongoDB for backend, React and CSS for frontend and React-redux for state management

Online Note Taker

- <https://github.com/PradeepK9/NoteTaker>
- A web-based application where we can add, delete, modify our notes. we can also see our all notes with created timestamp
- Used Java, Servlet and Hibernate for backend and JSP, CSS and bootstrap for frontend. Used oracle as database

Kids Mosquito Killer Game

- <https://kids-game-by-pradeep.netlify.app/>
- <https://github.com/PradeepK9/Kids-Game-ReactJS>
- It is an interesting game which is developed by using JavaScript, React and CSS
- It is an interesting game which anyone can play, we can kill mosquito by clicking on it and can see our scores
- It has difficulty levels we can choose easy, medium, and hard levels
